Incident General Information

Wiley Flat Fire

Ochoco National Forest

Wiley Flat ICP Location: Paulina Rodeo, 68011 SE Paulina Highway, Paulina, OR

Northwest GACC

Native land of the following tribes: Tenino, Nüümü (Northern Paiute), Confederated Tribes of Warm Springs, Cayuse, Umatilla and Walla Walla

Management

California team 1

Personnel

Maximum: 678; Minimum: 190; Average: 519

Headcount data taken from Situation Report

*This was determined by overlaying the Incident Fire Map from InciWeb with data from Native-Land.ca to identify the native lands affected by the Wiley Flat Fire.

W E G E N E R A T I V E

EXECUTIVE SUMMARY

WeGenerative is pleased to present the Waste Diversion Report for the Wiley Flat Wildfire. During our 12 days on the incident implementing waste reduction operations at the ICP, we achieved a significant 32.9% diversion rate by weight overall.

Our approach prioritized community engagement and collaboration. We successfully partnered with local recyclers, farmers, food banks, and on-site personnel, emphasizing the importance of mutual support and positive relations within our team. WeGenerative firmly believes that our team is our most valuable resource, and our focus on positive team morale is instrumental in the success of our operations.

The detailed waste diversion data illustrates our dedication to accurate measurements and calculations. We meticulously weighed and measured materials, deriving diversion data from verified, weighed loads. Noteworthy is our commitment to food donation, contributing to over 2,807 lbs of food scraps benefiting multiple local pig farmers and 1,231 lbs of edible food to the local food bank. Additionally, we monetized recyclables to donate proceeds to the Wildland Fire Fighter Fund furthering our commitment to community support.

WeGenerative is grateful for the opportunity to contribute positively to the local community, turning would-be waste into valuable resources and promoting environmental stewardship. Our dedication to waste diversion extends beyond statistics; it represents a commitment to a more sustainable and responsible future.

OUR TEAM

Our team included (listed in order pictured) Sophia Nielsen, Doug Landers, Isidora Allen, and Chikara Sakamoto.

WEGENERATIVE

DIVERSION SUMMARY

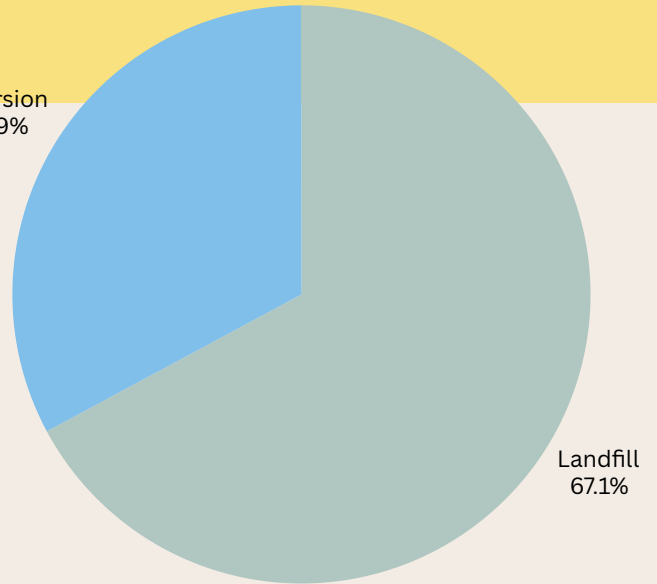

We diverted
by weight overall.

32.9%

Landfill
29,000 lbs

Total diversion:
14,187. lbs

Diversion
32.9%

The pie chart to the right shows diverted (blue) vs wasted materials, (grey) by percentage of weight.

Chikara tossing 55 gallon bag of sorted plastic bottles to recycling staging area. September 2024.

DIVERSION DATA

The bar chart below shows the diverted materials as compared to the landfilled materials. Both are measured by weight, in pounds. Combined recycled materials made up the greatest weight overall of all diverted materials when considering each diverted stream: recycling, organics, food donation, and special/other materials.

Recycle includes cardboard, paper, plastic bottles, metal cans, scrap metal, and glass.

PICTURE THE IMPACT

It's difficult to imagine what **14,187.25 lbs** of total diversion looks like. Instead, picture this:

We saved 14 cows from landfill

A Jersey cow, one of the most common cow breeds raised for milking, weighs an average of 800-1200 lbs.

Regardless of whether you picture the resources saved as pounds or cows, our operation saved a significant weight from landfill.

DIVERTED MATERIALS

The following graphic demonstrates the diverted streams at this wildfire.

The visual representation of each material stream is in approximate (not exact) proportion to its significance by weight.

DIVERTED MATERIALS

This pie chart shows all diverted materials by percentage of weight. The most significant material diverted (by weight) was cardboard, accounting for over half, 55.3%, of diverted material.

DIVERSION DATA METHODS

We meticulously weighed, measured, and calculated material weights while on incident. All of our data is from verified, weighed loads.

Compost/food scrap were individually weighed by the bucket or bin, as shown left before being donated to local farms.

Photo to left: Chikara and Doug use a hand scale to weigh a bag of food scraps. September 2024.

Cardboard weights were derived from weight tickets from Republic Services weight receipts. Bottles and cans were weighed by the bag using a hand scale before being brought to Bottle Drop Redmond. Other recycled materials were weighed using a hand scale before being brought to Deschutes Recycling Bend.

Food donation weights were weighed by the box by both our team as well as by local food bank.

Batteries were weighed by the bucket, with final weights verified by Battery Recyclers of America upon mass pickup. Other special materials were individually weighed.

MATERIAL TOTALS

Commodity Type	Amount (Pounds)
Cardboard	7,840
Plastic #1	572.06
Plastic #2	0
Paper	548
Aluminum	62.02
Tin	60
Glass	45
Scrap Metal	40
Food Scrap	2,807.45
Food Donation	1,231.4

Commodity Type	Amount (Pounds)
Cooking Oil	280
Batteries	280
E-Waste	6
Grey Water	358.63
Hose	3

Paulina Rodeo ICP

WeGenerative team members Chikara, Doug, and Isidora sorting at the recycle center. September 2024,

Wiley Flat Fire's ICP was at the Paulina Rodeogrounds in Paulina, Oregon. Upon arrival, the IMT had already allocated back of house work space for our team, and worked enthusiastically with us to allocate front of house Recycle Center locations. We were given the ability to advise on dumpster placement and to communicate more directly with our friends at Republic Services, facilitating a streamlined and productive operation. This location was two hours from the closest recycling infrastructure in Prineville, Terrebonne and Redmond. We were grateful to work with two different local farmers in Terrebonne.

RECYCLE CENTER

Photos from top clockwise:

Wiley Flat Recycle center. September 2024.

WeGenerative team sorting at the recycle center. September 2024.

Wiley Flat Recycle center from side angle. September 2024.

PROGRAM IN ACTION

Photos from top left, clockwise (September 2024):

Isidora and Doug record weights of plastic bottles.
Sophia works with DD Ranch to unbag compost into
an skidsteer bucket.

Chikara and Isadora put out bins sets.

Chikara weighs 55 gallon bag of bottles using hand scale.

Photo of full cardboard dumpster.

Five brutes holding bags of food scraps.

Chikara carrying bag of food scraps to box truck.

PROGRAM BENEFITS

Benefits of implementing waste reduction at this wildfire included:

Giving back to local farmers. We donated edible food and food scraps on a daily basis. On average, we donated 233.95Lbs food a day to local farmers.

Food Sorted, Saved, and Donated to Food Banks. We donated over 1,231.4lbs of edible food to Saint Vincent De Paul Food Bank in Redmond, OR.

Recycling Proceeds Donated to NonProfits. Our sorted recyclables were monetized for donation to charity. Charity options were presented to logistics teams based on our engagement with the community and selected by the Logistics Chief. We donated \$1,665.75 to the Wild land Fire Fighter Fund Oregon Chapter.

Reducing liquid trapped in landfill. It is estimated that 1% of the world's fresh water supply is trapped in water bottles with their caps on, sealed in landfills. We always empty the liquid out of water bottles and other containers while we sort waste. We partnered with a grey water contractor on site to recycle 358.6 Lbs of grey water.

Turning would-be waste into resources. On the Wiley Flat fire we partnered with Sequential to recycle 280 Lbs of cooking oil, which will be converted to biofuel. We also collected 335.2 Lbs of batteries which were responsibly recycled by Battery Recyclers of America.

SUPPORTING LOCAL FARMERS

We are grateful to have worked with a total of 2 farmers; DD Ranch and Kelly's farm.

We worked with each farmer to ensure that the food scraps we brought them adhered to the unique needs of their animals. Over the course of our time on incident, we donated an average of

233.95 LBS OF FOOD TO FARMERS A DAY

DD Ranch

Photos from top left, clockwise (September 2024): Pigs eating load of scraps. Pigs asking for more. Pigs coming up to ask for scraps. Soph and Jo unloading a load of scraps from truck into skidsteer bucket.

SUPPORTING LOCAL FARMERS

Kelly's Farm

Photos top to bottom (September 2024): Skittles the pig is fed a vegetable from food scraps. Skittles the pig smiles. Yoshi enjoys getting attacked by puppies. Wasabi the goat and Noodle the pig demand more snacks. Panini the pig wiggles for snacks.

FOOD DONATIONS FOR THE LOCAL COMMUNITY

We focus on food donation as the most valuable resource to save from waste and contribute positively to the local community. We partnered daily with the caterers and the Reefer team at each ICP, and sorted through individual leftovers and lunches to achieve large volumes of daily food donation. We donated food to Saint Vincent De Paul Food Bank.

1,231.4 LBS OF FOOD DONATED

Brute containing Non-perishables separated out while sorting waste. 9/19/24.

Three brutes containing Non-perishables separated out while sorting waste. 9/19/24.

102.6 LBS FOOD DONATED A DAY

RECYCLING FOR CHARITY

We sorted, transported, and monetized recycling including plastic bottles and aluminum cans for donation to the Wildland Fire Fighter Fund Oregon Chapter. In total, recycling became

\$1,665.75 DONATED

Photos, top left clockwise: Chikara carries bags of recycling to load. Chikara hands Doug bags of recycling to load. Chikara throws bag after weighing it. September 2024.

SPECIAL MATERIALS

Special materials require special considerations, processes, and outlets. They include pallets, batteries, cooking oil, scrap metal, and fire hose.

Photos from top left, clockwise (September 2024): Batteries collected at the Wiley Flat Fire. Brute containing grey water before being retrieved by grey water contractors. Box of house old hazardous waste gas and aerosol cans. Used cooking oil tank.

GREENHOUSE GAS EQUIVALENCES:

The Impact of Saving Food From the Landfill

On the Wiley Flat fire we saved 4,038.4 lbs of food from the landfill, this includes both the edible food we donated to local food banks and food scraps we donated to farmers. It's hard to picture what it looks like to save 4,038.4 lbs of food from being landfilled, let alone the 15,345.92 lbs of methane emissions* consequently prevented from entering the atmosphere and negatively contributing to the greenhouse gas effect.

Instead, picture this:

From the food waste we saved alone...

(not including any of the emissions saved from recycling efforts of other materials)

We sequestered the same amount of carbon as:

288 acres of US forests in a year

We saved the greenhouse gas emissions equivalent of

25.4 homes' energy use for one year

*a single pound of food waste that is not landfilled is estimated to save 3.8 lbs of methane emissions according to the Food and Agriculture Organization. Emissions equivalencies above are calculated using the EPA Emissions Equivalence Calculator.

LESSONS LEARNED

The following are our team's lessons learned.

Challenges

We found the following challenges at this particular incident

- ICP was far from recycling outlets and any town.
- There was protocol in the catering eating area to not leave the area with food, making a front-of-house compost station difficult to implement.

Successful Strategies

- Having front-of-house food scrap buckets that were frequently checked at meal times instead of a front-of-house compost plate-scrap station
- Working with Facilities and Republic directly to help place dumpsters, our team was able to place recycle center adjacent to dumpsters, dumpsters next to exits, and ensure that all waste and recycling infrastructure fit within camp traffic flow.

Safety Best Practices

- Ensuring brutes of compost for kitchen back of house are not filled more than 1/4-1/3 full, such that one person can lift them alone.

The team in front of Rosie the truck! Chikara, Isidora, Soph, and Doug.

Thank You

SPECIAL THANKS TO

The Wiley Flat Fire Daily Diversion Log tracks the daily weight (in pounds) of materials diverted from the landfill during the fire. This log provides a clear overview of our recycling efforts, including a breakdown of various materials. The 'Other' category includes items such as fire hoses, electronic waste (E-Waste), and scrap metal.

PERFORMANCE EVALUATIONS

2 of 4 Standard Contractor Performance Report

Highlighted blocks are required to be completed.

Evaluation Type: Interim Final <input checked="" type="checkbox"/> (check one)	
Evaluating Organization (Fire Name):	Reporting Period: From _____ to _____
Contracting Office:	Contract Number: _____ Order Number (Resource Order/Incident #): _____
Contractor Name:	Contractor Address:
DUNS:	City: _____ State: _____
Additional or Alternate Contractor Name:	Zip/Postal Code: _____ Country: _____
TIN: _____ Industrial Code (NAICS): _____	Commodity Code: _____ Contract Type: _____
Contract Award Date: _____ Contract Expiration Date: _____	Contract Value: _____
Requirement Description (Equipment Type): Incident Recycling	

Ratings

Summarize contractor performance and check the number which corresponds to the rating for each rating category (See attached Rating Guidelines).

Quality of Product or Service (How did the Contractor perform, document any noncompliance or performance issues)

0=Unsatisfactory 1=Poor 2=Fair 3=Good 4=Excellent 5=Outstanding

Government Comments for Quality of Product or Service (2000 characters maximum):

Soph + her team are my favorite recycling crew to work with. When they show up, I know that waste will be minimal + they will take pride in the quality of their work.

Timeliness of Performance (Did the Contractor arrive when expected, demob timely, and perform the work in a timely manner)

0=Unsatisfactory 1=Poor 2=Fair 3=Good 4=Excellent 5=Outstanding

Government Comments for Timeliness of Performance (2000 characters maximum):

TRASH NEVER builds up when WEGENERATIVE IS ON SCENE. They work quickly + efficiently.

Business Relations (Did the Contractor perform in a business-like manner, complete administrative requirements timely)

0=Unsatisfactory 1=Poor 2=Fair 3=Good 4=Excellent 5=Outstanding

Government Comments for Business Relations (2000 characters maximum):

All team members are friendly + have a passion for their work. Questions are responded to quickly + the team as a whole are professional + upbeat.

2

PERFORMANCE EVALUATIONS

2. Performance Evaluation Clause (Replace paragraph D.20 with the following; and attach a copy of the Standard Contractor Performance Report)

D.20 PERFORMANCE EVALUATIONS

The Contractor's performance will be documented on the Standard Contractor Performance Report (Exhibit E) which will be completed at the incident by the government representative supervising the work. This form is the only performance evaluation form that will be accepted by the Contracting Officer. The evaluator's signature shall be legible or printed on the form. If the supervising Government representative is released from the incident prior to the release of the resource, the government representative shall complete a performance evaluation prior to demobilization, for work the resource performed under their supervision. A copy of the evaluation form(s) will be given to the Contractor at the incident, one forwarded to the CO, and one copy retained in the Host unit incident file.

The evaluation forms, in addition to other performance information will be utilized to facilitate the compilation of the Contractor's performance report for each Agreement year and may be used in past performance evaluations for future procurements.

Additional Comments: I would work with Soph + WeGenerative any day of the week. Her team is always smiling + willing to answer any questions about how to properly dispose of something. Soph goes above + beyond to minimize the waste footprint of wildland fire camps + to cultivate positive relations with local farmers through the donation of food scraps.

I've seen too many fires where the recycle crew does the bare minimum, but never WeGenerative, + this is a view shared by almost everyone I speak with. They have set the bar high for my expectations in waste diversion, + they always deliver quality product + customer service.

I cannot wait to work with this team again in the future.

PERFORMANCE EVALUATIONS

Quality of Product or Service

Unsatisfactory	Non-conformances are jeopardizing the achievement of contract requirements, despite use of Agency resources. Recovery is not likely. If performance cannot be substantially corrected, it constitutes a significant impediment in consideration for future awards containing similar requirements.
Poor	Overall compliance requires significant Agency resources to ensure achievement of contract requirements.
Fair	Overall compliance requires minor Agency resources to ensure achievement of contract requirements.
Good	There are no, or very minimal, quality problems, and the Contractor has met the contract requirements.
Excellent	There are no quality issues, and the Contractor has substantially exceeded the contract performance requirements without commensurate additional costs to the Government.
Outstanding	The contractor has demonstrated an outstanding performance level that was significantly in excess of anticipated achievements and is commendable as an example for others, so that it justifies adding a point to the score. It is expected that this rating will be used in those rare circumstances where contractor performance clearly exceeds the performance levels described as "Excellent".

0 = Unsatisfactory 1 = Poor 2 = Fair 3 = Good 4 = Excellent 5 = Outstanding

Timeliness of Performance

0 = Unsatisfactory 1 = Poor 2 = Fair 3 = Good 4 = Excellent 5 = Outstanding

Unsatisfactory	Delays are jeopardizing the achievement of contract requirements, despite use of Agency resources. Recovery is not likely. If performance cannot be substantially corrected, it constitutes a significant impediment in consideration for future awards.
Poor	Delays require significant Agency resources to ensure achievement of contract requirements.
Fair	Delays require minor Agency resources to ensure achievement of contract requirements.
Good	There are no, or minimal, delays that impact achievement of contract requirements.
Excellent	There are no delays and the contractor has exceeded the agreed upon time schedule.
Outstanding	The contractor has demonstrated an outstanding performance level that justifies adding a point to the score. It is expected that this rating will be used in those rare circumstances where contractor performance clearly exceeds the performance levels described as "Excellent".

Business Relations

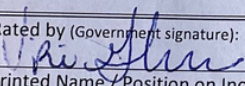

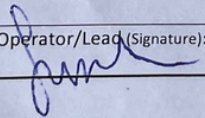

0 = Unsatisfactory 1 = Poor 2 = Fair 3 = Good 4 = Excellent 5 = Outstanding

Unsatisfactory	Response to inquiries and/or technical, service, administrative issues is not effective. If not substantially mitigated or corrected it should constitute a significant impediment in considerations for future awards.
Poor	Response to inquiries and/or technical, service, administrative issues is marginally effective.
Fair	Response to inquiries and/or technical, service, administrative issues is somewhat effective.
Good	Response to inquiries and/or technical, service, administrative issues is consistently effective.
Excellent	Response to inquiries and/or technical, service, administrative issues exceeds Government expectation.
Outstanding	The contractor has demonstrated an outstanding performance level that justifies adding a point to the score. It is expected that this rating will be used in those rare circumstances where contractor performance clearly exceeds the performance levels described as "Excellent".

A narrative/justification is not necessary for vendors that were rated Satisfactory in all categories on this evaluation. Additional pages can be used as need.</p> <p>Quality of Service: Was the Vendor's <i>Quality of Service</i> (knowledge of the job, physical condition of personnel, attitude, decisions under stress, initiative, use of safe practices, crew organization, performance of resource, equipment organization/reliability, and supervisory performance) satisfactory on this incident?</p> <p style="text-align: center;"> <input checked="" type="checkbox"/> SATISFACTORY <input type="checkbox"/> UNSATISFACTORY </p> <p>Narrative/justification: Great attitudes, always with a smile. Very organized with the sorting of the garbage and keeping it contained. They followed the rules of the camp and cautiously made their way through following one way signs and speed.</p> <p>Timeliness: Did the Contractor arrive when instructed and complete assigned work in a timely and satisfactory manner while on the incident?</p> <p style="text-align: center;"> <input checked="" type="checkbox"/> SATISFACTORY <input type="checkbox"/> UNSATISFACTORY </p> <p>Narrative/justification: Yes, they arrived when they said they were going to. They kept up with the recycling and never left large piles in their sorting area for too long. They were very quick to sort through the trash and put in the respective bins.</p> <p>Business Relations: Did the Contractor complete administrative work as required (IE: check in, finance and demob) and conduct themselves in a professional and satisfactory manner while on the incident?</p> <p style="text-align: center;"> <input checked="" type="checkbox"/> SATISFACTORY <input type="checkbox"/> UNSATISFACTORY </p> <p>Narrative/justification: Yes. They did all their administrative work in a timely manner. They conducted themselves professionally at all times during our interactions.</p>
